WORK EXPERIENCE

Junior Fullstack Developer
NTT Limited Philippines

📅 March - July 2025

- Developed and maintained responsive web applications using PHP and the Laravel framework.
- Built and enhanced back-office systems for administrators and player-side features for end users.
- Integrated RESTful APIs and conducted API testing using Postman in an Ubuntu Linux environment.

PHP Developer
Golden Arrow Digital Solutions

📅 January 2024 - February 2025

- Integrated RESTful APIs and built backend logic using PHP (OOP) with a PostgreSQL database.
- Create and executed unit and feature tests with Postman and Laravel testing tools.
- Contributed to front-end redesign using Blade templates and improved UI/UX performance.

CAPSTONE PROJECT / THESIS

📅 March - December 2022

Water Level and Flood Alert Notifier For The Municipality Of Macabebe, Pampanga.

- Real-Time Flood Alert System for Macabebe, Pampanga with SMS notifications. Features include real-time water level monitoring, flood history records, SMS settings managed by admin, user registration, and a dashboard. Explore more on my portfolio website.
